

RE09**Commercialization**

Classification:	Research
Responsible Authority:	Director, Applied Research
Executive Sponsor:	Senior Vice President, Academic
Approval Authority:	Algonquin College Executive Team
Date First Approved:	2022-12-20
Date Last Reviewed:	2024-08-12
Date to Complete Mandatory Review:	2029-08-12

PURPOSE

The College has developed this policy in conformity with the requirements of the Ontario Commercialization Mandate Policy Framework, giving due consideration to the specificities of research in a college environment, the College's other policies relating to Intellectual Property (IP) and the current legislative framework. By adopting this policy, the College aims to foster an environment in which the commercialization potential for the Intellectual Property derived from Applied Research services rendered to third party entities (TPEs) can be maximized for the benefit of Ontarians. More specifically, by adopting this Policy, the College seeks to achieve the following:

- Promote the appropriate use and protection of IP arising from the College's research activities;
- Maximize the socioeconomic benefits to Canada and Ontario of such IP;
- Promote individual and collective compliance with College and third-party expectations with regards to applicable legislation and regulations;
- Define the roles and responsibilities of the various stakeholders in the management of Arising IP; and
- Promote the use and dissemination of research results in subsequent teaching or research activities at the College.

SCOPE

This policy applies to:

- All employees or contractors of the College
- All students of the College involved in paid research activities

Who generate Intellectual Property in the course of government-funded Applied Research activities. Other Intellectual Property, for example, copyright in literary works, authored by the foregoing persons, is addressed in the College's RE05 Intellectual Property policy.

Nothing in this Policy restricts an employee exercising their rights under a relevant collective agreement.

DEFINITIONS

Word/Term	Definition
Applied Research	Applied research is the development of innovative solutions to real-world challenges. It tackles practical problems by applying the latest technology and knowledge to create new products, services, and processes, or improve current products and practices (source: Colleges and Institutes Canada).
Applied Research Office	The research administration office of the College
Arising IP	IP that is developed by one or more parties in the course of Applied Research activities which did not previously exist. It is also referred to as "Foreground IP".
Collaborative Research Agreement	Written agreement between the College and a third-party entity (TPE) that delineates the terms, rights and responsibilities of each party of a research project undertaken collaboratively between the College and the TPE.
Commercialization	The process of taking an invention or scientific discovery (for example, new technology or new or improved manufacturing process) or other IP to one or more commercial markets.
Confidentiality Agreements	Confidentiality Agreements are executed between the College and a third party to protect the IP of both parties. They may also be called a Non-Disclosure Agreement (NDA).
Creator	Any employee, including faculty, staff or student who creates IP at the College.
Intellectual Property (IP)	Any form of knowledge or expression created by one's intellect that can be legally protected, including technical information, inventions, models, drawings, photographs, specifications, prototypes, computer software, curriculum and teaching materials and other creations that can be protected under patent, copyright, trademark, integrated circuit topography, plant breeders rights and industrial design laws. For the purposes of this policy, confidential information having a commercial value is to be considered Intellectual Property.
Invention	A tangible or intangible concept, system, device, process, machine, scientific discovery, work, or creation, which is unique and original, as well as any related Intellectual Property. Inventions can be issued a patent under the <i>Patent Act</i> (Canada).

Patent	Is, in Canada, a right granted by the federal government to the inventor (or a person to which the investor has assigned their rights) to stop others from making, using and/or selling an Invention from the day the patent is granted to a maximum of 20 years after the day on which the patent application is filed.
Public Disclosure	The communication of information relating to IP to external parties, including students who are not presently contractors or employees of the College. Public Disclosure includes, but is not limited to, disclosure in written or oral form; communication by email; posting on a web blog or social media platform; disclosure in a news report, press release or interview; publication in a journal, abstract, poster, or report; presentation at a conference; demonstration of an Invention at a trade show; or the industrial application of an Invention.
Third-Party Entity (TPE)	An industry or community partner with which the College has contracted to provide applied research services that could result in Arising IP. Also referred to as "client," "partner," and/or "collaborator."

POLICY

1. GENERAL PRINCIPLES

1. IP Policy

This policy is to be read in conjunction with the College's IP Policy RE05, which addresses the ownership of intellectual property developed by its employees and students.

2. Disclosure

All Creators have an obligation to promptly disclose to the College Intellectual Property with commercial potential. The College shall establish a procedure to facilitate such disclosure to the ARO or TPE. This may include the use of a disclosure form, or it may be included in a report provided to the TPE that describes the Invention or other IP, the Creators, and any existing agreements related to the Invention or other IP. For clarity, such disclosure is not considered Public Disclosure.

Given that the responsibility to disclose vests with individuals, the College will educate potential Creators on the importance of thorough and timely disclosure.

3. Non-disclosure and confidentiality

While disclosure of IP is important, non-disclosure of IP is equally so. Creators should be aware that Public Disclosure may result in loss of IP

protection rights. This is especially true of Inventions as, generally speaking, a patent is difficult or impossible to obtain if Public Disclosure of the Invention has occurred. Care must therefore be taken to avoid premature disclosure before a patent application has been filed. In light of this, Creators are strongly encouraged to make all reasonable efforts to identify any protectable IP as early as possible, and consult the ARO before making any Public Disclosure of IP.

4. Confidentiality

Partnerships and research collaborations with TPEs often involve the communication by them of confidential proprietary information, some of which is likely to implicate Intellectual Property. Any Collaborative Research Agreement must contain confidentiality clauses, and any College employees and students must be made aware of such confidentiality provisions to ensure that they are respected.

Persons engaged in research shall treat as confidential all information received in the context of research activities that is designated as confidential by the party disclosing it or protected by a confidentiality clause. This is especially important in the context of an Invention that could be patented, since a patent cannot be obtained if there has been Public Disclosure of the Invention.

TPEs may require individuals within the College community to sign non-disclosure agreements (NDAs) as additional protection, often prior to the College and the TPE entering into a Collaborative Research Agreement. In such case, unless the NDA contains clauses that cannot be considered “standard”, the individual shall be required to sign the NDA as a condition of participating in the project to indicate their acknowledgement of the NDA terms.

Finally, where the ARO believes that Intellectual Property belonging to the College, or which the College licenses from a third party, may be divulged in the course of research activities, the College will request the TPE to sign a non-disclosure agreement. As a matter of practice however, the NDA which the TPE is asking the College to sign may offer the parties mutual protection.

5. Use of a proper binding agreement

Regardless of the Commercialization Pathway ultimately chosen Collaborative Research Agreements that could result in the creation of new Intellectual Property must be documented in a written contract that:

a. protects the interests of the College, faculty and staff, and students, for example by minimizing the potential for, and the consequences of, a breach of the agreement and saves it harmless from future IP-related claims; and

b. retains rights for the College to use the IP for educational and research purposes.

In all instances, the contract shall explicitly or implicitly provide that the decision to commercialize Arising IP will rest with the TPE.

6. Rights retained

The College must endeavour to maintain the right to use any Arising IP resulting from a Collaborative Research Agreement for internal academic and teaching purposes, including for the purposes of enhancing curriculum relating to the subject matter thereof and of providing case studies and examples of research-derived IP and the management thereof.

2. ROLES AND RESPONSIBILITIES

1. The College

As an institution supporting and facilitating the commercialization of Intellectual Property created in Ontario, the College's role is to ensure that intellectual property created with the use of its physical and human resources (i.e., Arising IP) will be identified, protected from disclosure and transferred to TPEs or, if so directed by them, to third-parties who are capable of assessing the IP's commercial potential.

2. Applied Research Office (ARO)

The ARO is responsible for the administration of all matters relating to IP at the College. Its functions include:

- Ensuring and promoting compliance with this policy and other IP policies of the College, if any, namely by informing relevant stakeholders of their rights, roles and responsibilities
- Responding to questions regarding the application, interpretation and implementation of this policy
- Managing agreements signed with TPEs, including non-disclosure agreements, assignments and licences, including establishing, negotiating and reviewing all such agreements, with the assistance of legal counsel if necessary, before they are signed by any employee, contractor or student of the College
- Serving as the repository for the foregoing agreements
- Reviewing all written IP disclosures in a timely manner

- Where possible, supporting staff members, students and industry partners with any issue related to IP protection and commercialization
- Making members of research teams aware of the terms and conditions of the relevant research agreement that could impact them (such as disclosure and confidentiality provisions).

The ARO is not responsible for identifying Inventions or confirming the ownership of Intellectual Property that have not been disclosed as per Section 1.2 above.

3. Signing Authorities

Signing authorities at the College are delegated as per the College's Board of Governors Policy BG II-06 - Delegation of Contract Signing Authority. This policy identifies individuals with authority to legally bind the College, and must sign all agreements that could result in Arising IP, including all Collaborative Research Agreements.

4. Deans, Directors and Chairs

The deans, directors and chairs of the College are responsible for supporting and implementing this policy.

5. Employees

College employees, including faculty, staff, paid researchers and paid students, are responsible for abiding by this policy.

All employees of the College whose work may involve the creation of intellectual property have a duty to both disclose and protect such intellectual property.

6. Creators

All Creators have an obligation to promptly disclose Intellectual Property with commercial potential (see section 1.2 of this policy).

Creators shall collaborate with the College TPEs and any other relevant third party in order to identify and protect third-party IP rights, as well as any rights that the College may have in IP.

Creators recognize that ownership of Arising IP resulting from projects involving third parties depends on the terms of the agreement between the College and the third party. In the vast majority of cases, rights of Creators will be transferred to the third party that commissioned an Applied Research project.

Creators may be asked to sign a waiver, an assignment of rights or any other document relating to ownership and protection of the Arising IP (see section 5 below).

3. EDUCATION AND AWARENESS

In order to promote the objectives of this policy, the College may:

1. provide all employees with access to IP education resources made available by the IP office of the Province of Ontario (IPON)
2. organize and hold annual “IP 101” sessions, during which participants will be introduced to the contents of the College’s IP Policy and this commercialization policy
3. provide access to IP training and education information materials on the College Intranet
4. raise awareness of this Commercialization Policy by posting in faculty newsletters (printed and/or online)
5. take any reasonable steps to further the objectives of this policy.

4. PROVIDING NET BENEFIT TO ONTARIANS AND INSTITUTIONAL ENGAGEMENT WITH THE INNOVATION ECOSYSTEM

In order to build institutional capacity to conduct Applied Research and thereby develop and enhance Ontario-based IP, the College will continue to build and maintain relationships with local innovation ecosystem partners such as incubators, accelerators, innovation centres, research networks, without however impacting federal funding received by the College in relation to the Applied Research projects it undertakes.

Partnering with Ontario businesses will result in a net benefit to Ontarians by keeping IP development and enhancements in Ontario. In order to optimize the commercial potential of the College’s Applied Research activities, the College will:

1. prior to entering into a Collaborative Research Agreement, make a summary assessment of the TPE in order to confirm that it has a minimum level of viability; and
2. Following the completion of the Collaborative Research Agreement, transfer and/or confirm the transfer of Arising IP to the TPE.

5. DISCREPANCIES AND EXCEPTIONS

In case of discrepancy between this policy and the terms of a Collaborative Research Agreement, the terms of the Agreement shall prevail. Any other exception to this policy requires prior approval of the Applied Research Office.

PROCEDURE

	Action	Responsibility
1.	Disclosure: Develop Process and Training as part of Initial Commercialization Plan (<i>Pending Ministry Guidance</i>)	Office of Applied Research (ARO)
1.1	Disclosure of IP: Disclose all potential arising IP to the ARO	All Student and Staff on Applicable Projects
2.	Commercialization Training: Develop and/or promote resources on IP and Commercialization	Office of Applied Research (ARO)
	Commercialization Training: Undergo mandated training on IP, Non-disclosure, Confidentiality and Commercialization	All Student and Staff on Applicable Projects
2.1	Summary Assessment: Develop process for partner viability assessment prior to entering collaborative research agreements with TPEs.	Office of Applied Research (ARO)
3.	Commercialization Plan and Reporting: Develop Annual Commercialization Policy Implementation Plans and Reports and submit to the Ministry (<i>Pending Ministry Guidance</i>)	Office of Applied Research (ARO)

Appendix 1: Background – Commercialization Mandate Policy Framework

Appendix 1: Background – Commercialization Mandate Policy Framework

In July 2020, in response to the recommendations of the Expert Panel established in Spring 2019 to help Ontario become more strategic in its approach to generating, protecting and commercializing intellectual property (IP), the government of Ontario released the province's first Intellectual Property Action Plan. One of the key action items of the Plan is to clarify the commercialization mandates of post-secondary institutions. In response, the Ministry of Colleges and Universities released a Commercialization Mandate Policy Framework in early 2022 directing each post-secondary institution to develop a Commercialization Policy focused on the objective of harnessing the intellectual property generated with the institution's resources so as to achieve Ontario's goal of ensuring that made-in-Ontario innovations benefit Ontarians.

Under the Ontario Colleges of Applied Arts and Technology Act, 2002, the objects of the Algonquin College of Applied Arts and Technology (the "College") are to offer a comprehensive program of career-oriented, post-secondary education and training to assist individuals in finding and keeping employment, to meet the needs of employers and the changing work environment and to support the economic and social development of their local and diverse communities. The Act further provides that in carrying out its objects, the College may undertake a range of education-related and training-related activities, including applied research. It is within such context that the College involves its students, faculty and other staff in Applied Research projects, notably through the rendering of Applied Research services to Third-Party Entities (TPEs). Through its applied research activities, the College, along with all other Canadian colleges, plays a critical role in supporting small and medium-sized enterprises (SMEs), fostering competitiveness and innovation, and contributing to Ontario's economic growth.

This policy recognizes that the College, like most colleges in the Province of Ontario, is neither equipped to assess the commercial potential of Arising IP nor to manage a portfolio of Intellectual Property rights. As such, these tasks are left to other actors in the Ontario innovation ecosystem, such as TPEs. This policy provides a framework for the College's role of supporting these actors and facilitating the commercialization by them of Arising IP.

This policy has been developed within the unique applied research funding context for Ontario colleges. The operating funding provided to colleges by the province is designed to support the core education and training mandate of colleges and does not reflect the costs of exploring, developing and overseeing applied research projects. These costs must be met through other revenue sources. Funding from granting agencies, primarily federal agencies, is crucial for the College to undertake specific applied research projects. These projects increase innovation at the community and regional level by enabling the College to work with companies to develop solutions to specific business and technical challenges. With the help of such funding, the College can actively engage in Applied Research and collaborations that can lead to the

commercialization, as well as technology transfer, adaptation and adoption, of new technologies by TPEs.

This policy is to be reviewed no less than every 2 years in order to reflect the College's experience with Intellectual Property and with other participants in the innovation ecosystem.
